GEZONDHEID UIT DE NATUUR

LOVE FOR BIO

HEALTH, STRAIGHT FROM MOTHER NATURE.

Love For Bio is more than a brand - it is our promise to connect you with the pure, beneficial power of nature. We believe true health is rooted in authenticity, not artificial additives. That's why we have created an exclusive range of organic products, each carefully curated to guide you towards a healthier lifestyle. With Love For Bio, we invite you to discover the transformative power of nature. Taste the difference, feel the difference, live the difference - welcome to Love For Bio.

LOVE FOR BIO

THE MEDICINAL PROPOLIS. WHAT IS THAT?

Propolis is produced by honey bees from plant resins, pollen and saliva. It is used to strengthen hives and protect them from invaders and pathogens. Propolis contains more than 300 compounds, including flavonoids, phenolic acids and essential oils.

The production process of propolis is a natural and self-regulating process that takes place in the hive. Bees collect the resins and process them into propolis, combining the properties of the resins with their own enzymes and beeswax. This results in the unique composition and properties of propolis.

Propolis has many health benefits because of its unique composition and the active substances it contains. The various components in propolis work together and provide various biological effects that contribute to its potential health benefits.

LOVE FOR BIO

HOW DOES PROPOLIS COME ABOUT?

Collection: Bees collect propolis from plants and trees.

Removal: Frames or grids where bees have collected propolis are carefully removed from the hive.

Separation: Propolis is separated from other bee products, such as beeswax and bee pollen.

Cleaning: Propolis is cleaned to remove impurities.

Processing: Propolis can be further processed into various products, such as tinctures, capsules or creams.

LOVE FOR BIO

WHAT IS PROPOLIS GOOD FOR?

Strengthens the immune system: Propolis can support the immune system and help defend against disease and infection.

Antioxidant effect: Propolis contains antioxidants that help neutralize free radicals and protect cells from damage.

Fights bacteria and viruses: Propolis has antimicrobial properties and can be effective against harmful bacteria, viruses and fungi.

Relieves inflammation: Propolis has anti-inflammatory properties and can help reduce inflammation in the body.

Promotes wound healing: Propolis can accelerate the healing of wounds and support the healing process.

LOVE FOR BIO

WHAT IS AN EXTRACTION?

Propolis in its raw form (as it comes from the hive) is not digestible in our bodies. When we consume propolis directly in its raw form, the digestion rate in our body is only 2%. Therefore, raw propolis must be extracted.

Extraction is a process in which we want to get a specific substance separately from a mixture. To do this, we use a liquid that can dissolve the desired substance. The liquid extracts the desired substance from the mixture, while leaving the other substances behind.

Propolis is separated and purified during the extraction process, but remains unprocessed and retains its natural properties.

Propolis Extract 20% Pure Anatolian Propolis Contents 30 ml

- Support to the immune system
- Rich in antioxidants
- Support to respiratory health

INGREDIENTS:

Pure Anatolian Propolis (20%), Water,
Ethanol (Food Grade)

QUALITY:

Product quality is ensured by enforcing appropriate beekeeping practices at all steps of production in beekeeping. Moreover, our products are subjected to relevant laboratory analyses to ensure their purity, biological activity levels and compliance with food safety standards.

Propolis Extract Water-Soluble 10% Pure Anatolian Propolis Contents 30 ml

- Immune system support
- Daily well-being
- Can help fight bacteria, viruses and fungi
- Can help remove toxins from the body
- Can help fight inflammation

INGREDIENTS:

Active ingredients: Pure Anatolian Propolis (10%)
Extractants: Water, Glycol (Food Grade)

ANTIOXIDANT POWER:

Love For Bio's Propolis Extract is a formula designed as nature's defence to bring out the best in you. These drops have high antioxidant power because of its rich content of flavonoids and phenolic compounds.

Propolis Raw Honey Throat Spray 6% Pure Anatolian Propolis Contents 30 ml

- Fast reacting
- Breath freshener
- 100% natural
- Resistance supporting
- Support to oral health
- 10 ml of antioxidants

INGREDIENTS:

Raw Honey (10%), Propolis (6%), Menthol (0.1%), Water, Glycol

A UNIQUE FORMULA:

Benefit from the unique formula and vitality from the beehive. The spray soothes the throat and cleanses your oral cavity. Propolis is known for its anti-inflammatory and bactericidal properties.

Propolis Nasal Spray
5% Anatolian Propolis Extract
Contents 30 ml

- Supports sinus and nasal health
- Provides relief from nasal congestion
- Can provide relief from respiratory infections
- Can provide relief from hay fever

INGREDIENTS:

Deionised water, propolis extract (5%), sea salt

HAY FEVER:

Several studies show that the use of propolis can significantly reduce hay fever symptoms.

PROPOLIS SHOT

Propolis Shot Zinc + Vitamins C + Vitamins D3 Contents 50 ml

- Caffeine-free
- Support to the immune system
- Energy boost
- Resistance support

INGREDIENTS:

Orange juice, Raw honey, Pure Anatolian Propolis (1%), Vitamin D3, Vitamin C, Zinc.

HEALTH:

Medical research shows that combining propolis, zinc, vitamin C and vitamin D in supplement form works together to promote overall health and well-being.

Natural Energy Shot (Red Ginseng + Royal Jelly + Anatolian propolis) Contents 50 ml

- Strong formula + Caffeine-free
- Energy and immune support
- Contains iron, calcium, phosphorus, and vitamins B1 + B2 + B3 + B9 + C
- Completely natural and sweetened with raw honey and pomegranate juice
- Fresher looking skin

INGREDIENTS:

Pomegranate juice, Raw honey, Korean red ginseng (3%), royal jelly (3%), Anatolian propolis (1%).

RED GINSENG:

Red Ginseng is a plant that grows in Asia and is harvested only after six or more years. The type of ginseng used in the product contains the active ingredient ginsenoside in the highest concentration.

Anatolian Propolis (KIDS) | Black elderberry | Carob Contents 30 ml

- Contains high levels of magnesium; calcium; selenium; zinc; iron
- Immune booster
- No added sugars; 100% natural
- Source of vitamins and antioxidants

INGREDIENTS:

Strawberry juice, Raw honey, elderberries (15%), carob extract (10%), Anatolian propolis (1%).

CAROB:

It is the fruit of an evergreen tree growing in the Mediterranean Region. It naturally contains vitamins, minerals, amino acids, fatty acids, fibre, phenolic and flavanoid components.

Anatolian Propolis - Royal Jelly - Raw Honey blend Contents 190g

- Strengthens the immune system and fights bacteria, viruses and fungi thanks to its powerful antimicrobial properties
- Stimulates daily mental performance, improves concentration and prevents brain fog
- Provides vitality and energy for an active lifestyle.
- Proven high bioavailability for the human body.

INGREDIENTS:

Raw honey (95.5%), royal jelly (3%), Anatolian propolis (1.5%).

ROYAL JELLY:

Royal jelly is a valuable bee product secreted by worker bees to feed baby bees and the queen in the hive. When queen bees are fed only with royal jelly, they grow twice as large and live 30 times longer than other bees.

Mix of Propolis, Royal Jelly and Raw Honey (KIDS) Contents 190 g

- Stimulates appetite
- Supports immune system
- Supports healthy brain development in children
- Long-term intake of royal jelly may have beneficial effects on cardiovascular health

INGREDIENTS:

Raw honey (97.5%), royal jelly (1,5%), Anatolian propolis (1%).

KICKSTART THE DAY, TOGETHER.

When children start the day with a healthy breakfast, we both feel good.
